Experience

- Carefully analyzed test results and information gathered during examinations to properly diagnose illnesses and diseases.

- Closely examined patients' medical history, medication allergies, physical condition and test results to verify necessity of operations and to determine proper procedures.

- Regularly evaluated infants and children to assess growth and development compared to average childhood patterns.

- Improved performance at the organizational, departmental and individual levels.

- Maintained accurate medical records and documented patient case history in detail.

- Examined up to 60 patients per day with various medical instruments and equipment.

- Inoculated and vaccinated patients to immunize them from communicable diseases.

- Regularly referred patients to medical specialists or other practitioners for more specialized courses of treatment.
